MARKETING FUNNEL & CONVERSION PERFORMANCE ANALYSIS

Future Interns – Data Science & Analytics Internship | Task 3

Prepared by: Gonchala Lakshmi Padmaja

Report Date: 07 November 2026

Dataset: Olist Marketing Funnel Dataset

Dataset Source: https://www.kaggle.com/datasets/olistbr/marketing-funnel-olist

1. Project Overview

This project analyzes marketing qualified leads and closed deals to understand lead-to-customer conversion performance. It evaluates conversion drop-offs, marketing channel effectiveness, landing-page performance, monthly trends, and deal-closing time.

The analysis uses the MQL dataset and closed-deals dataset, connected through the common mql_id field.

2. Key Performance Indicators

KPI	Result
Total Marketing Qualified Leads	8,000
Total Closed Deals	842
Leads Not Converted	7,158
Lead-to-Closed-Deal Conversion Rate	10.53%
Lead Drop-off Rate	89.48%
Median Days to Close	14 days

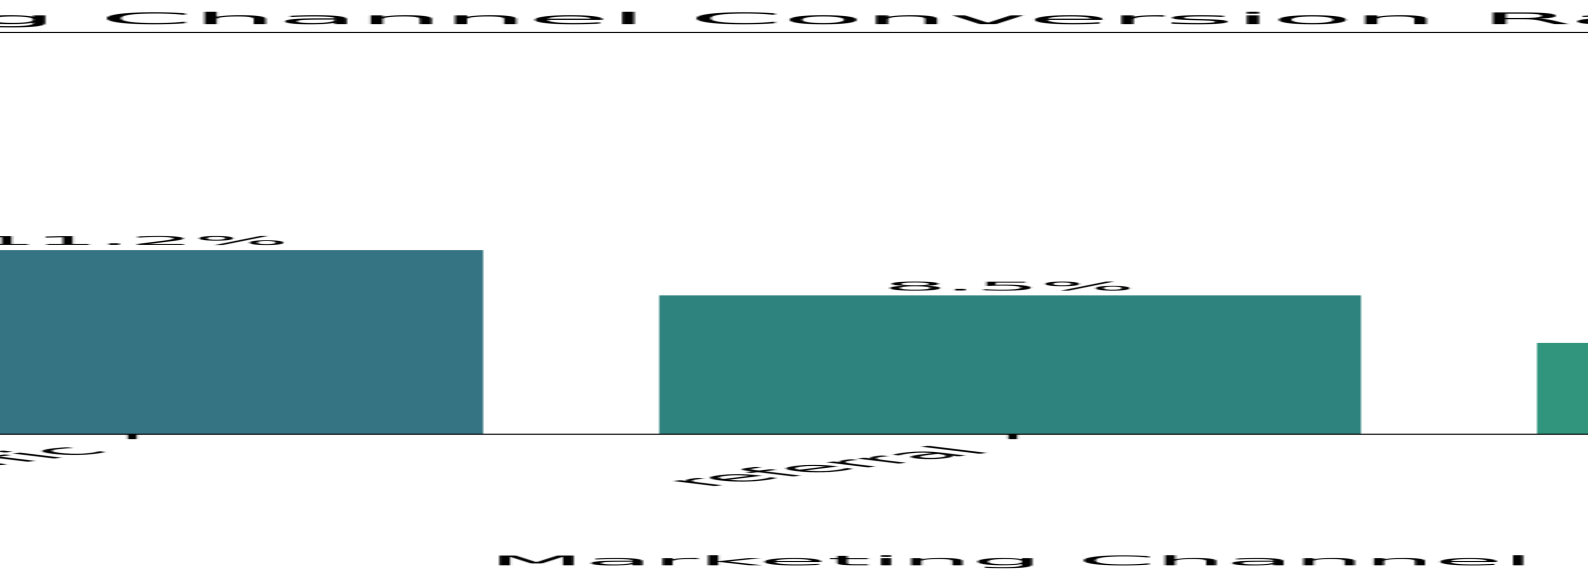

3. Marketing Channel Performance

Marketing Channel	Leads	Converted	Conversion %
missing_unspecified	60	14	23.33%
unknown	1,099	179	16.29%
paid_search	1,586	195	12.30%
organic_search	2,296	271	11.80%
direct_traffic	499	56	11.22%
referral	284	24	8.45%
social	1,350	75	5.56%
display	118	6	5.08%
other_publicities	65	3	4.62%
email	493	15	3.04%
other	150	4	2.67%

Key finding: Among identifiable marketing channels, paid search achieved a 12.30% conversion rate, followed by organic search at 11.80%. Social media recorded 5.56%, while email marketing recorded 3.04%.

The missing/unspecified origin category contains only 60 leads. Its 23.33% conversion rate should not be interpreted as a high-performing marketing channel.

4. Landing Page Performance

Landing Page ID	Leads	Converted	Conversion %
b76ef37428e6799c42...	912	171	18.75%
22c29808c4f8152133...	883	174	19.71%
58326e62183c14b0c0...	495	27	5.45%
88740e65d5d6b056e0...	445	31	6.97%
ce1a65abd0973638f1...	394	59	14.97%
40dec9f3d5259a3d2d...	330	67	20.30%
f017be4dbf86243af5...	310	21	6.77%
e492ee5eaf16977169...	291	10	3.44%
a7982125ff7aa3b205...	156	18	11.54%
73f31a40697cc90a86...	115	4	3.48%

Among the top ten landing pages by lead volume, one page achieved a 20.30% conversion rate. Another page generated 912 leads but converted at 18.75%. A high-volume page with only 3.44% conversion presents an opportunity for improvement.

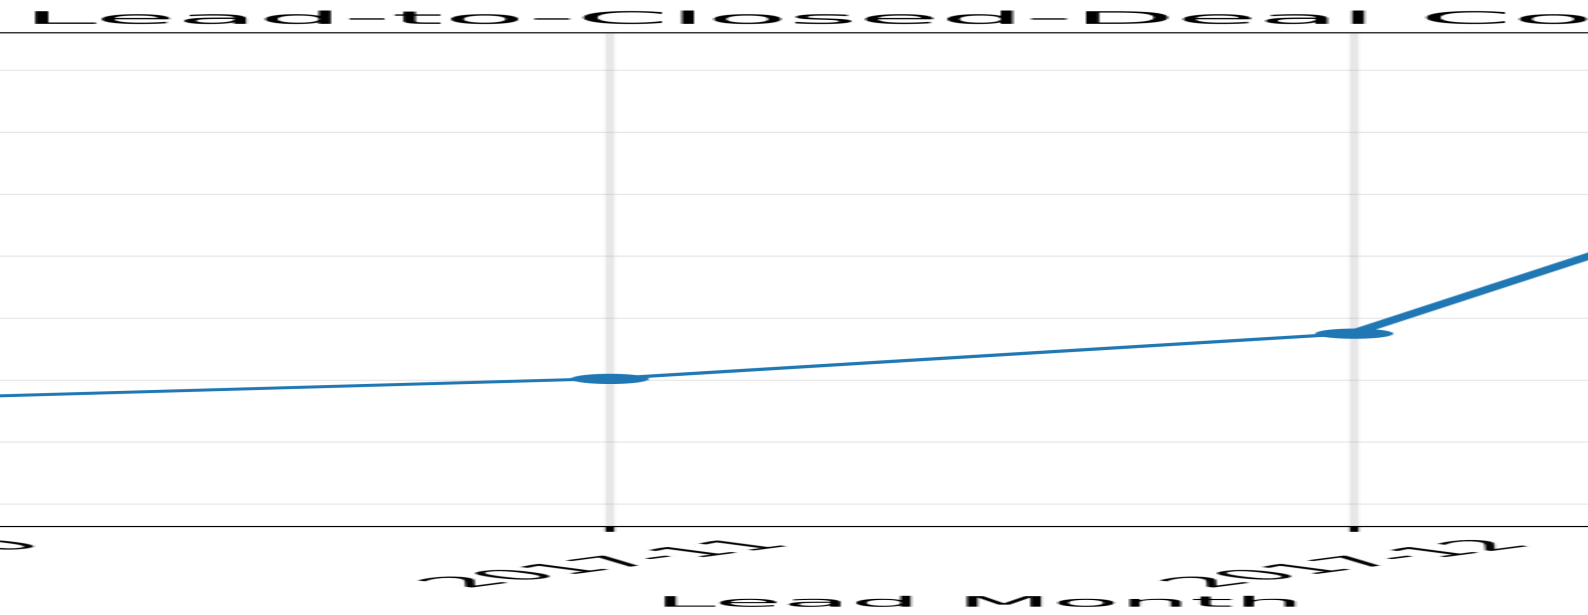

5. Monthly Conversion Trends

Month	Leads	Converted	Conversion %
2017-06	4	0	0.00%
2017-07	239	2	0.84%
2017-08	386	9	2.33%
2017-09	312	7	2.24%

Month	Leads	Converted	Conversion %
2017-10	416	14	3.37%
2017-11	445	18	4.04%
2017-12	200	11	5.50%
2018-01	1,141	152	13.32%
2018-02	1,028	149	14.49%
2018-03	1,174	167	14.22%
2018-04	1,352	183	13.54%
2018-05	1,303	130	9.98%

April 2018 recorded the highest lead volume with 1,352 leads and 183 closed deals. February 2018 achieved the highest monthly conversion rate at 14.49%.

Monthly conversion rates should be interpreted cautiously because newer leads may not have had enough time to become closed deals.

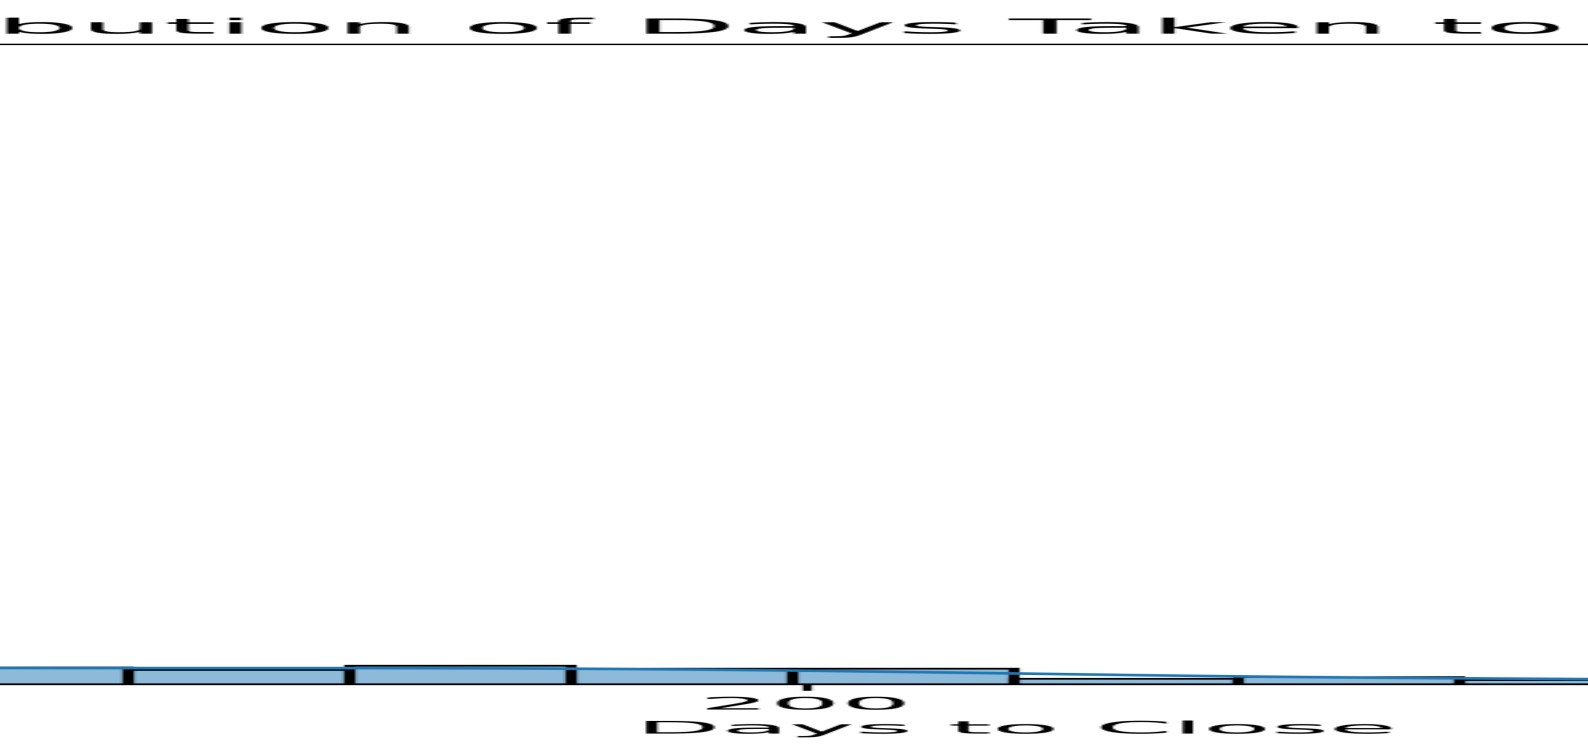

6. Deal Closing Time Analysis

After excluding one record with a negative date difference from the timing analysis, 841 valid deal records remained.

Metric	Result
Valid timing records	841
Average days to close	48.50 days
Median days to close	14 days
Minimum days	0

Metric	Result
Maximum days	427

The difference between the average and median indicates that some deals take considerably longer to close. A structured follow-up process can help sales teams monitor leads that remain open beyond the typical 14-day median.

7. Data Quality Findings

Data Field	Missing Records	Total Records
Marketing origin	60	8,000
Company information	779	842
GTIN information	778	842
Average stock	776	842
Product catalog size	773	842

Business profile fields have substantial missing information. This limits deeper analysis of company characteristics, inventory levels, and product catalog size. Improving data collection during lead qualification would strengthen future marketing and sales analysis.

The closed-deals dataset contains won deals only. Therefore, this report measures conversion from marketing qualified leads to recorded closed deals, not every intermediate marketing or sales stage.

8. Business Recommendations

• **Optimize paid search:** Improve high-intent keyword targeting and monitor campaign-level conversion.

• **Invest in organic search:** Strengthen SEO and content strategies that attract qualified leads.

- **Improve social campaigns:** Test audience segments, creative formats, and campaign messaging.
- **Review email marketing:** Improve personalization, subject lines, and calls to action.
- **Optimize landing pages:** Investigate high-traffic pages with low conversion and improve their content and CTAs.
- **Strengthen lead follow-up:** Use a structured follow-up schedule and monitor leads around the 14-day median closing point.
- **Improve data quality:** Collect company, GTIN, inventory, and catalog information more consistently.

9. Conclusion

The analysis identified a 10.53% lead-to-closed-deal conversion rate and an 89.48% drop-off rate. Paid search and organic search were the strongest identifiable marketing channels. Landing-page performance varied considerably, creating opportunities for targeted optimization. Better lead follow-up and improved data collection can support stronger conversion performance.

The interactive dashboard provides a visual summary of the marketing funnel, channel performance, monthly trends, landing pages, and deal-closing distribution.
